

TabCP - Insight Agent

Kickstart your GenAI journey in Tableau with **TabCP - Insight Agent** and The Information Lab!

Allow your teams to ask data questions in plain language and get reliable, context-aware answers instantly. Use GenAI and MCP securely while browsing your Tableau Dashboards.

What can it do?

Use a chatbot with your Tableau data sources in an interface that:

- lets all Tableau users interact with your curated data using natural language
- lets you connect your own LLM - cloud-based or self-hosted
- allows you to add metadata to your data sources even without a data catalog
- can be used with Tableau Cloud and Tableau Server

Our offer

We offer a transparent, fixed-price package of **10.000€** to help you get started and quickly realize value from **TabCP - Insight Agent**. This includes:

- ✓ A discovery workshop to identify high-impact use cases
- ✓ The secure setup of TabCP - Insight Agent in your environment together with IT
- ✓ Implementation of a use case together with IT and your data team to build knowledge right from the start
- ✓ Hands-on enablement for key users and consumers

The code is provided as-is and can be extended as you wish.

Who is it for

Tableau customers of any size and in any environment that want to use GenAI with their Tableau data. Does your data team drown in ad-hoc queries? Do you want to enable more users to leverage data and insights? Whether you use Tableau Cloud or Tableau Server, **TabCP - Insight Agent** has you covered.
